

AI Developer Reliability Runtime Founder Knowledge Base

This folder contains the current working source of truth for the startup concept.

Files

1. [01_PRODUCT_THESIS.md](#) — what problem we solve, the product thesis, intent compiler, verification loop, moat and positioning.
2. [02_BUSINESS_MODEL.md](#) — customer, monetization, investor narrative, expansion path, defensibility and pricing hypotheses.
3. [03_BUILD_APPROACH.md](#) — technical architecture, Claude Code wedge, hooks/MCP/CLI roles, MVP components and milestones.
4. [04_COST_AND_RESRCING.md](#) — staged budget, spending gates, team plan and fundraising timing.
5. [05_MVP_AND_REAL_DEV_DISTRIBUTION.md](#) — recruiting real developers, experiments, landing page, metrics, growth loop and 90-day plan.

Non-negotiable concept

Intent → Verified Result

The north-star product metric is:

Human Interventions Per Accepted Task

Any numeric examples discussed before real measurement are placeholders, not validated company metrics.
